LLS-UFO

Unique audio solutions for public areas and boardrooms

With the LSS-UFO, Audipack presents a new way to look at audio. The modern design of the UFO offers lots of possibilities for applications in public areas and boardrooms. The UFO is a ceiling suspended speaker with 4 internal audio elements. These elements radiate the sound in the direction of their own, so that a broad beam width is created in the area. The UFO is suspended from the ceiling by 4 stainless steel wires which are adjustable in length up to 4 meters.

The combination of the Aluminium anodized construction with the black or white front, not only make it a delight to look at, but also to listen to. In combination with modern lighting technique, the UFO is a perfect solution above a conference table, in a restaurant or luxury shop. By using multiple UFO's, you have stereo sound where ever you walk in de room. With the optional 100 Volt transformer, the UFO's are also usefull in 100 Volt installations.

- ▲ **Elegant solution for audio in public places**
- ▲ **Custom made to desired width possible**
- ▲ **Colour: Aluminium anodized with black or white speaker front**
- ▲ **4 x 30 Watt RMS at 8 Ohm**
- ▲ **Easy installation with provided stainless wires, adjustable in length up to 4 meter**
