

# **WPL-IV**

## **Installation manual**

**EN.**

**Attention.**

The WPL is an automated panel movement systems that manipulates a panel in 2 directions. **Aware for fingers, clothes and long hair during installation.**

**Attention:**

When you receive the system, the automated function is **disabled** for safety reasons and can be activated when the system is set correctly!

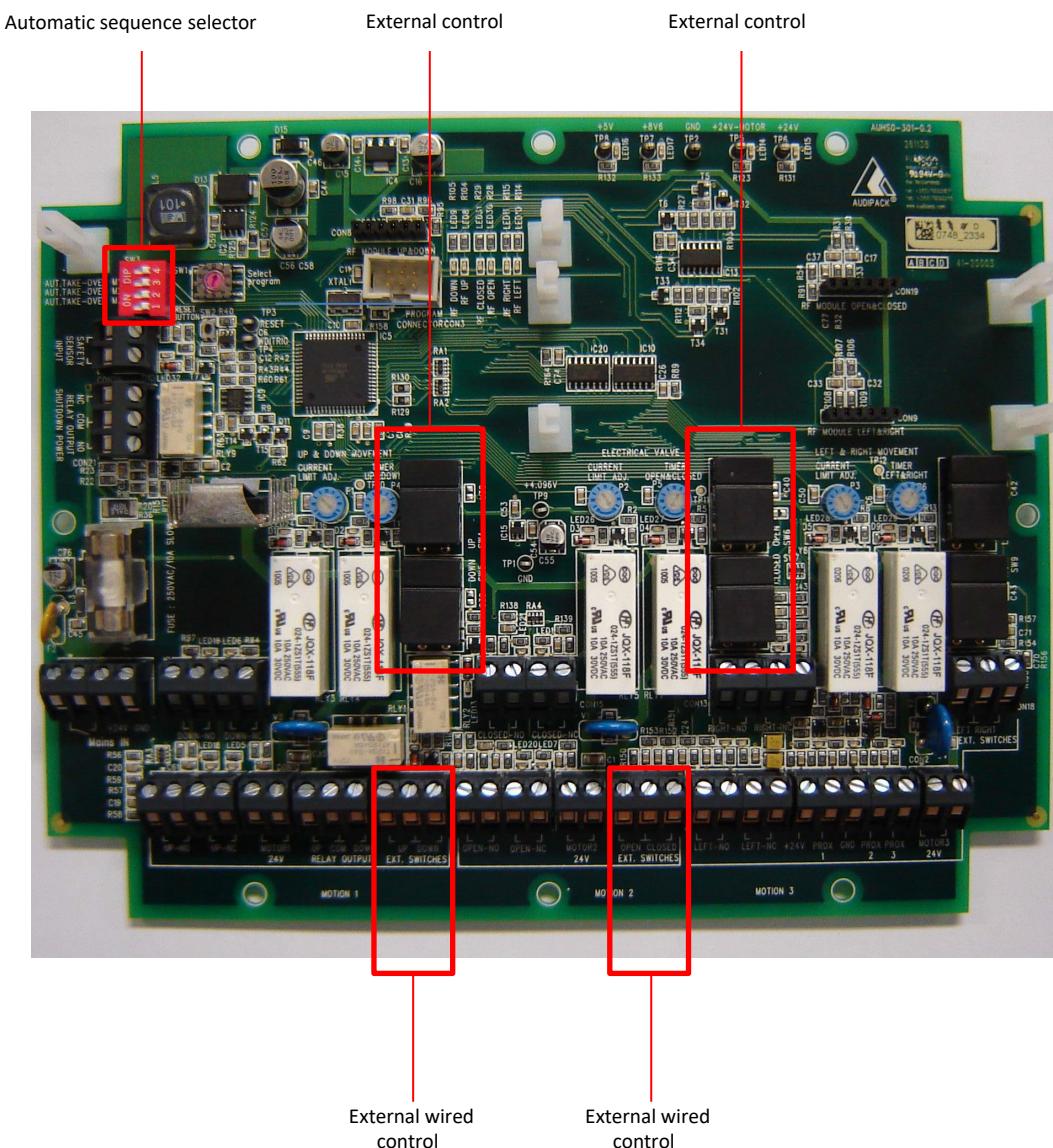

**The automated function includes:**

- Automatic vertical lift
- Automatic horizontal movement of the panel mechanism.

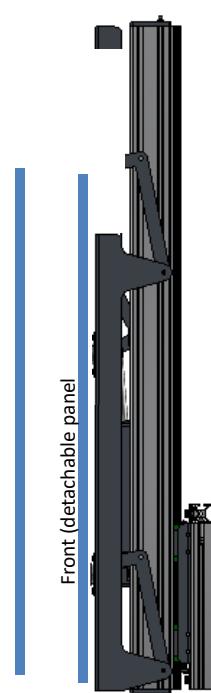

On the PCB manual activation buttons are available to move both movements by hand.

These buttons can be overrided with an external control.

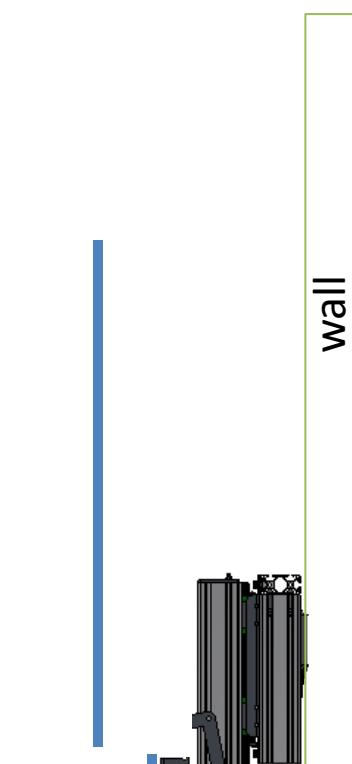

Use the PCB manual 261138 for correct connections

**EN.**

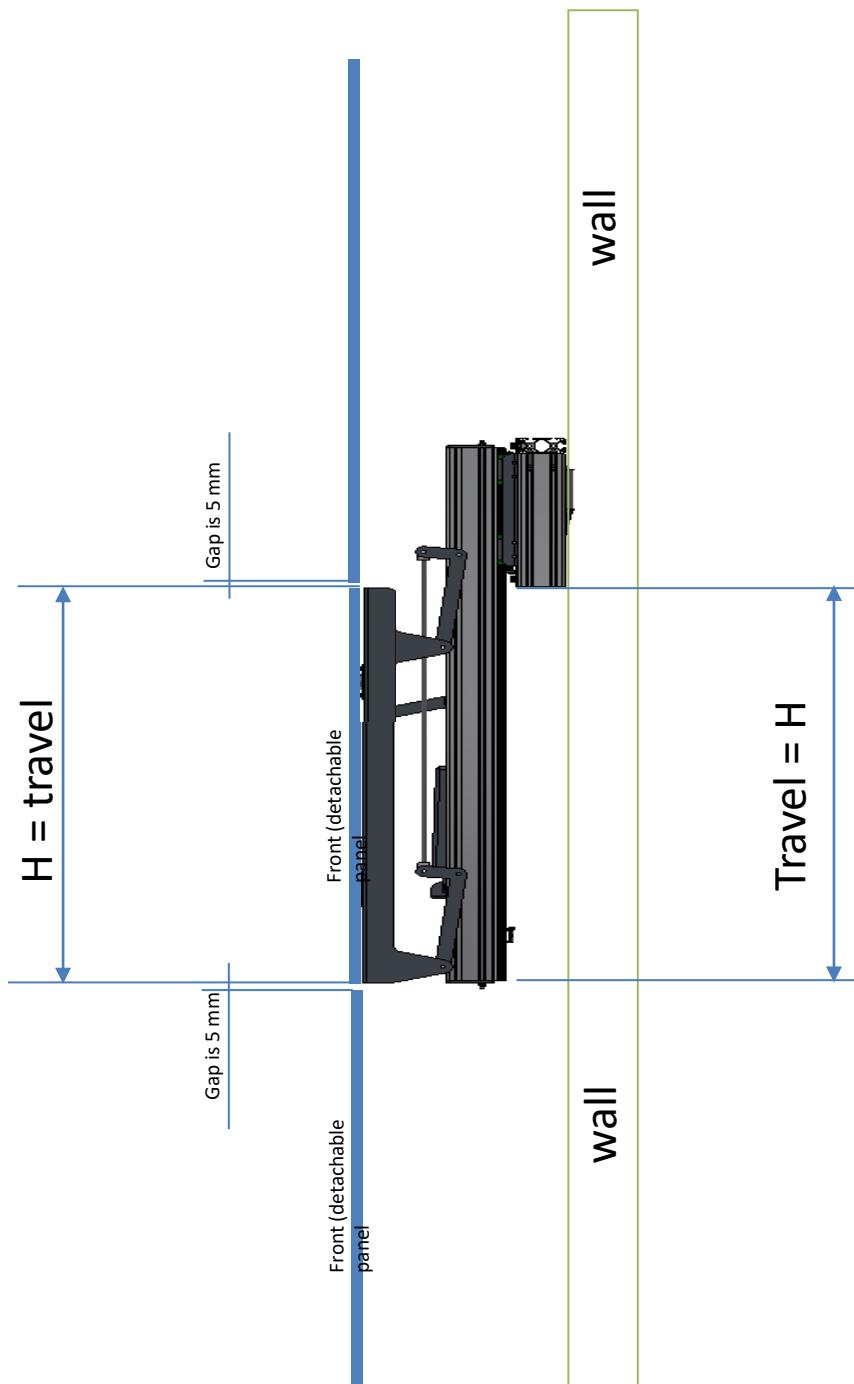

Mount the system to the back wall, equal to where the TV is mounted to.

Be aware of the max. TV thickness.

If the TV is too thick the unit can be mounted furter away from the wall using spacers.

Be sure the system is mounted parallel to the rear and front (finishing) wall.

**The front panel has an equal height as the travel of the system.**

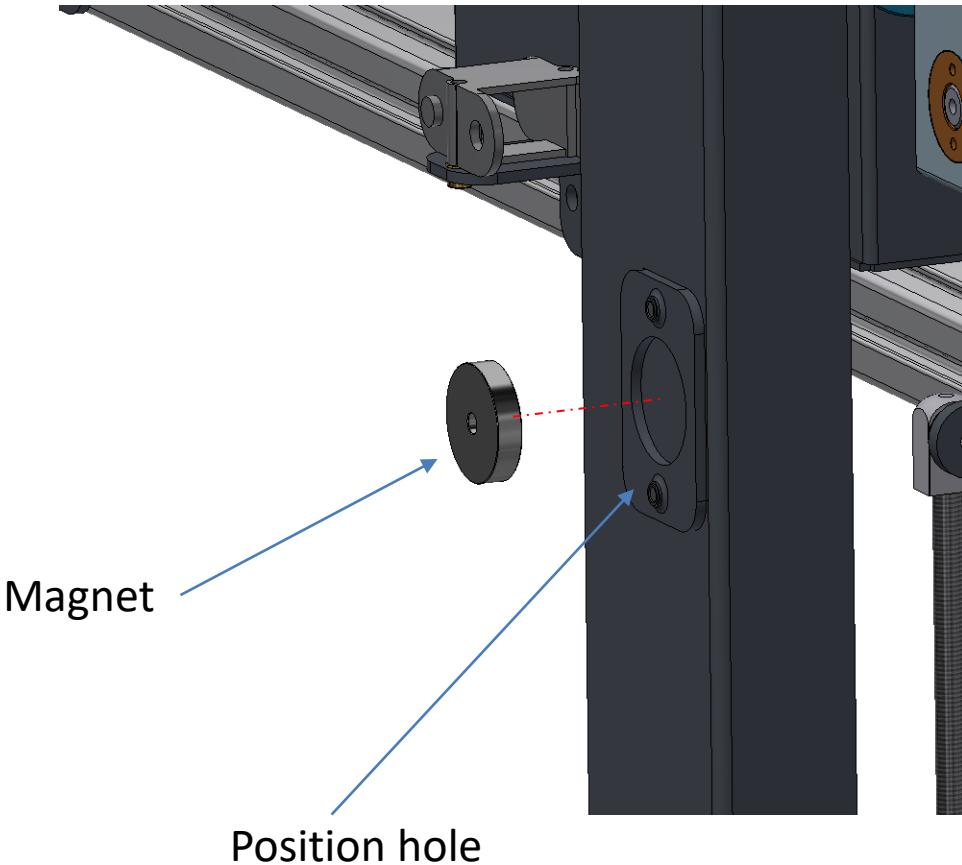

Vertical travel ?? mm

Forward movement ?? mm

**EN.**

The front panel that moves with the mechanim can be mounted with magnets to the system.

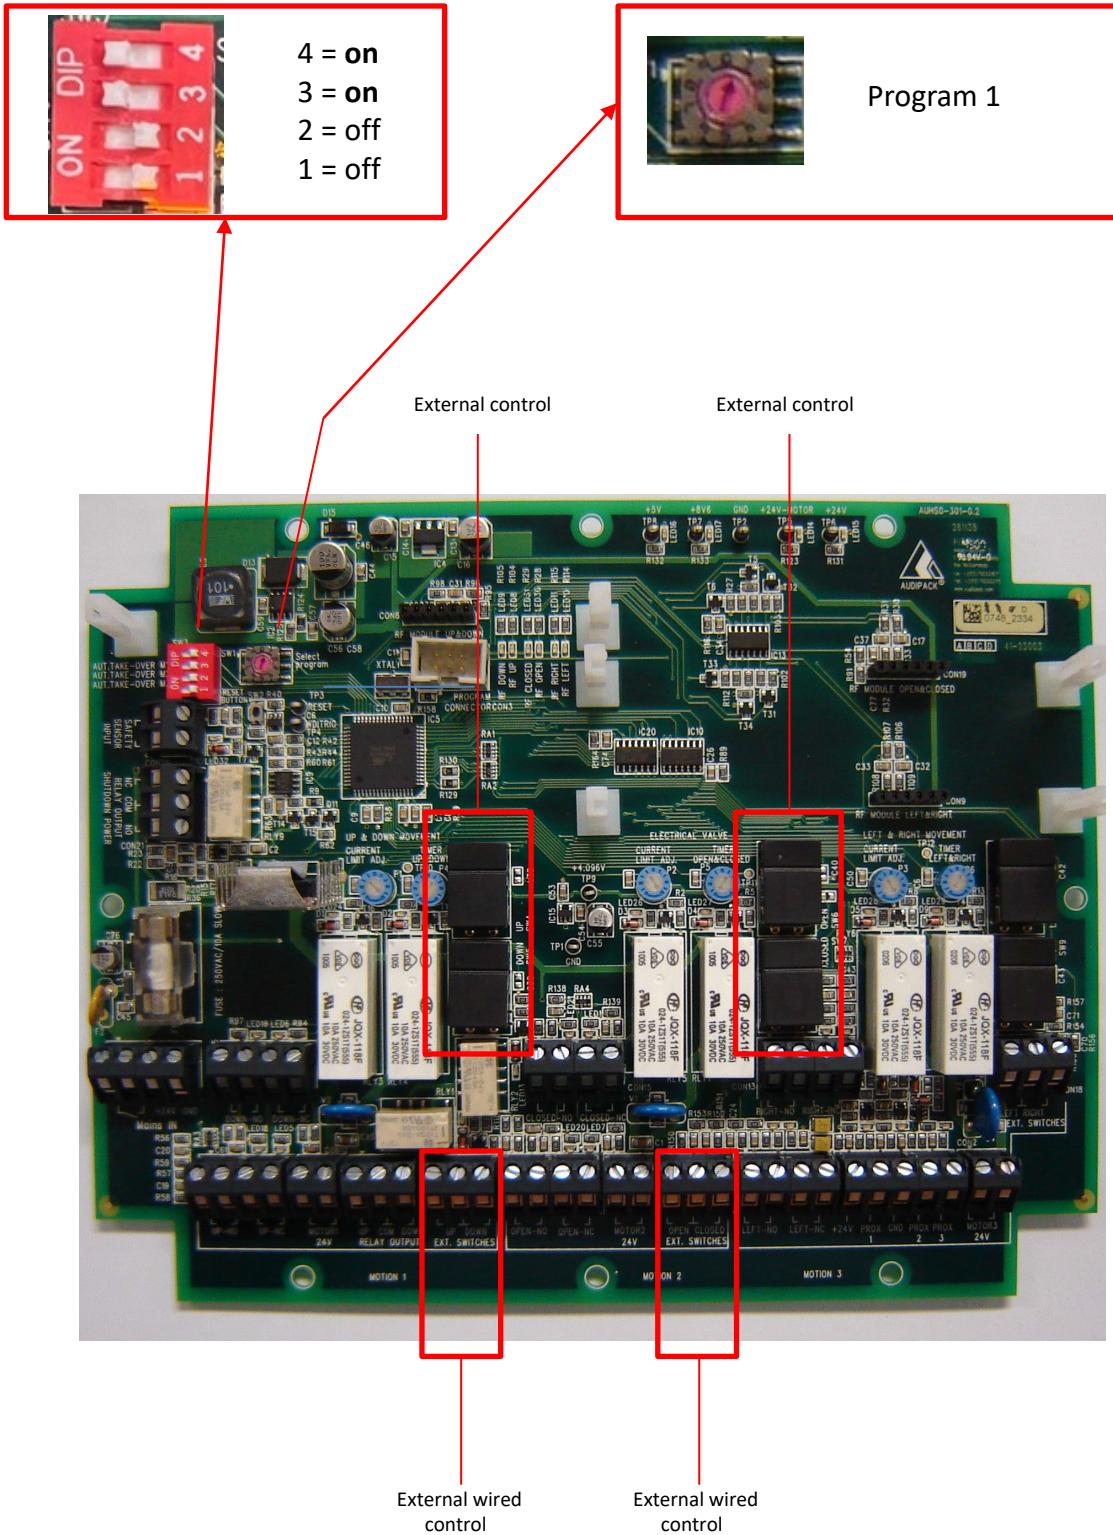

This makes it possible to remove the panel if needed.

## EN.

When the system is installed and works perfectly, moving parts free from fixed parts, the automated function can be activated.

On the PCB in the system is a red selector, set the dip switches according the below model. The standard programm selector is also set; never change that.

Use the PCB manual 261138 for correct connections
