Indoor housings

for flat panels

The indoor housings are the perfect way to protect and brand your flat panel

Audipack®

INDOOR HOUSINGS

Screens

in public places

Screens mounted in public places demand protective solutions.

The Audipack lockable indoor housings offer heavy-duty protection for the flat panel, and a sleek, modern look that does not detract from the screen content.

The indoor theft delay housing is a security housing for digital signage projects. A fully removable front with hardened glass protects the monitor.
It is available in portrait or landscape models.
The stylish glass front is made from polished, coated and hardened glass and the housing also offers internal space for equipment such as players and switchers.

Slim-line indoor theft delay housings are also available for LCD and LED screens with a reduction in depth of 50% to complement thinner panels.

▲ **Suitable for any brand and type   of flat panel**
▲ **Very easy installation**
▲ **Easy equipment and flat panel access**
▲ **Available in Any RAL colour and finishing**

| (FSMT-70) The flat panel is very easy accessible | High level finishing | Easy access after unlocking the glass front | Optional available in any RAL colour |

INDOOR HOUSINGS
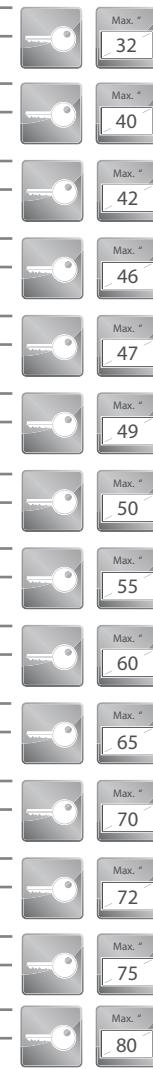

Screens in shops

FSMI housings with open front are suitable for installing screens in shop window environments. The open front structure allows to extract the heat radiation from the screen without using forced ventilation.

FSMI housing can be installed to 700 and 900 series floorstands and to the ceiling to floor CTF systems.

In combination with the ACG air curtain, the heat radiation of the shop window can be cooled down.
